

HermanMiller for Healthcare

Administration

Great places to heal

Herman Miller for Healthcare is a 30-year culmination of knowledge and understanding of the issues facing hospitals, trusts and clinics. This knowledge makes us more than just a furniture manufacturer; it makes us a furniture partner. We design environments with expertise, to create great places to heal.

Today's world of healthcare is fast-paced. Access to information is as important as keeping information confidential. Data protection requirements demand that technology must keep information safe and furniture secure. Our range of healthcare furniture supports and meets these needs.

Within administration areas, a change in work patterns and hospital design means many cellular-style offices are moving towards open plan areas. Communication lines between people are adapting to the 21st century, and workspaces need to be flexible enough to support a number of uses.

Herman Miller for Healthcare offers the best solutions for staff. Aesthetically pleasing and ergonomically designed, the health benefits are apparent. From senior clinical staff and CEOs to support workers in all areas of a facility, Herman Miller offers fully-flexible, adaptable solutions, which are cost effective and offer a fantastic return on investment.

Ergonomics and the healthcare environment

Ergonomic design considerations begin with human abilities and limitations, and how they affect the work process. Assessment of work tasks involves an examination of duration, frequency and magnitude of exposure to ergonomic stresses such as force, repetition, awkward postures, vibration, and contact stress to determine if employees are at risk of pain or injury.

Specific work environments in healthcare facilities may have additional technical and human interface requirements.

Consideration of ergonomic factors in healthcare facilities can make healthcare environments more user-friendly for patients and visitors alike. At Herman Miller we care about ergonomics. The subject has become central to making our products functional, safe and health promoting.

Sitting

Aeron®

Combining distinctive looks with pioneering ergonomics, Aeron performs like no other chair. It adapts naturally and adjusts precisely to fit people of all sizes and postures doing all kinds of activities, all day long. Designed by Bill Stumpf and Don Chadwick, Aeron features a patented pellicle mesh, allowing for aeration and pressure distribution, whilst Posturefit® provides natural, custom-fitted support below the beltline for healthier posture and outstanding lower-back comfort.

Mirra®

Mirra was the first task chair designed to meet Herman Miller's stringent Design for the Environment (DfE) protocols, which focus on creating economic value while valuing the environment and providing superior ergonomics. At 97% recyclable, Mirra is made of a minimal number of parts so that it can be easily disassembled for recycling. In addition, its Latitude™ back upholstery is 100 percent recyclable.

Celle®

Benefiting from the extensive research and design involved with both the Aeron and Mirra chairs, Celle completes the task chair trilogy. It offers ergonomic excellence and support for all shapes and sizes, making it perfect for any work setting. Its patented system of cells and loops flexes in concert with the body's movements for day-long comfort. At 99% recyclable, and with 33% recycled content, Celle is an affordable work chair fit for the 21st century.

Equa®

Equa means equal, as in equal, high-performance seating for everyone. And that means ergonomic comfort and support, regardless of a person's status, work activities, or physical size. It means a sophisticated design that's simple to use and responds naturally to any sitter. And it means a complete line, including side chairs and stools as well as work chairs. The stool option is widely used in clinical environments such as laboratories.

Caper®

Put simply, Caper is a really popular chair for healthcare environments, satisfying all requirements from waiting areas to administrative and breakout seating. A versatile and mobile product, Caper benefits from its ability to be cleaned with ease. Both the multipurpose and stacking models are lightweight and mobile for impromptu change. They are ideal for informal, flexible spaces where reconfiguration is encouraged, smaller scale is important, and budget is a concern.

Aeron work stool

The Aeron work stool shares the same ergonomic benefits of the Aeron task chair, but is designed for comfortable sitting at a higher level surface. The work stool features an important ergonomic innovation: the height-adjustable, full-circle, Fine-Tune foot ring, which can be adjusted by the user whilst in a seated position. When the foot ring is properly adjusted, sitters feel no pressure on their thighs, ensuring that blood circulation is unimpeded and comfort is long term.

Working

AbakEnvironments™

AbakEnvironments combines a progressive design with attention to detail, bringing international appeal to high-performance desking systems. A flexible, versatile and adaptable system, its concise set of versatile components makes AbakEnvironments perfect for private offices and collaborative work areas. A global solution designed to meet worldwide standards, AbakEnvironments can be customised at a local level to reflect regional preferences.

Resolve®

Resolve is a human-centred system that supports professionals and various work styles. Its intelligent structure creates open, inviting, space-efficient workstations where people feel comfortable and connected. From traditional workspaces to innovative applications, Resolve gives people the tools to be productive. With such versatile character, it lets an organisation create the environment that suits its vision while using its resources effectively.

Ethospace®

The Ethospace system continues to evolve as work changes, maintaining the integrity of its premier, high-performance design. With its wide choice of products, Ethospace responds to demands for traditional-looking environments, as well as for solutions that promote community, support new kinds of work, and handle sophisticated technology. Such versatility makes Ethospace a comprehensive system that can define and refine a space in the most effective way.

Action Office®

The world's first open-plan furniture system, Action Office continues to keep up with changes in the workplace, offering simplicity, value, perfect fit and proven function. With 90- and 120-degree planning options, Action Office is a versatile, hard-working system for practical organisations.

Working

My Studio Environments™

Personal, comfortable and controllable, My Studio Environments lets an organisation reap the benefits of a satisfied and effective work force. It fosters comfort, well-being and productivity in personal, human-scaled offices where people control their own privacy, their connection with others, and the direction they face. This unique package of capabilities helps organisations attract and keep in-demand knowledge workers that drive growth and innovation.

involve®

involve is ideal for meeting and conference rooms, training rooms, cafés and administration areas where people require furniture that is quick to assemble, sturdy and aesthetically pleasing. involve facilitates simple, quick and effective collaboration opportunities by the very fact that it is a quick-to-arrange and simple-to-use table.

Storing

Global Storage System (GSS)™

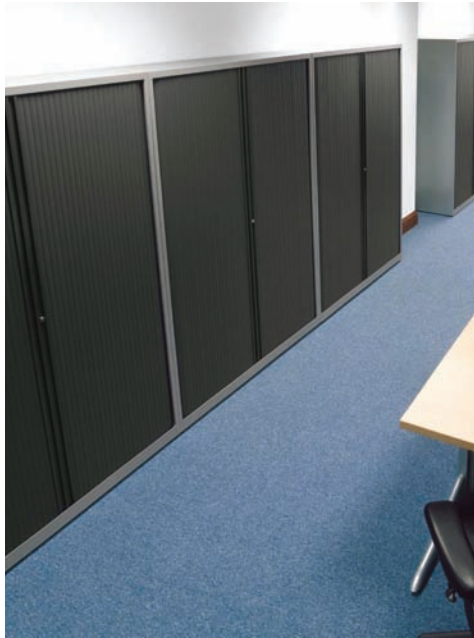

GSS is an integrated family of storage products for all parts of the administration area. It addresses the needs of active, intermediate and archival storage.

Meridian®

Modular, stackable and reversible, Meridian consists of a number of units that can be configured and reconfigured in thousands of ways to fit specific storage, space, and aesthetic requirements. By simply selecting the storage modules that are required, Meridian divides space, supports work surfaces, forms credenzas and counters, and combines with a variety of office systems to create space-effective environments.

Foris™

Wooden storage with a sleek aesthetic to complement any desk, office or departmental requirement, Foris combines pedestals, storage cupboards and filing drawers to create a simple and elegant environment.

Lighting

Leaf

Leaf enhances environments with its innovative design, combining unique aesthetics, industry-leading technology and unmatched user control. Touch controls make the light user-friendly, while LED technology gives the light a 60,000 hour life span. That's seven years at 24/7 use! Its patented heat distribution system allows users to 'touch the light', as it draws away heat from the LEDs. Energy consumption is 40% less than a fluorescent bulb at 8/9 watts. In addition, Leaf is 95% recyclable.
