We're working
to improve the
life
expectancy
of your chairs.

Get every function you need on one recliner

The Universal Brackets and Accessories from La-Z-Boy give new life to your old recliners by making them dramatically more versatile. In fact, with these accessories, which include an IV pole, oxygen bottle holder, side mount tray, document holder, and more, you won't have to buy a lot of other medical-related equipment. Which can add up to significant savings for you.

These easy-to-install brackets are simply one of a kind. Made for the QC Mobile Medical Recliner (LQ1007, shown below) and the Florin Mobile Medical Recliner (LF1007), they're designed to give caregivers more flexibility and your patients more comfort.

And because they're made of long-lasting corrosion-proof stainless steel, they're built to last. Which means administrators will be more comfortable too.

1 Universal Brackets and Support Tube (style # HACUB0)

- 2 brackets included
- Support tube provides additional torsion rigidity when push handles are used
- Installation of brackets will take less than 10 minutes and each bracket is designed so it cannot be put on incorrectly

Accessories (order separately)

2 Side Mount Tray Assembly (style # HACST0) & Tray Mounting Arm

- Comfortable for resting arm during medical procedures
- Folds down when not in use

3 Push Handles (style # HACP00)

- Enables caregiver to maneuver the recliner like a wheelchair
- Textured handle for comfort, bacteria control, and easy cleaning

4 Easy Lift IV Pole (style # HACZP0)

- Durable easy-lift thumb knob push-up
- One hand height adjustment

5 Document Holder (style # HACDH0)

- Gives caregiver easy access to documents
- Convenient for patients to store reading materials

6 Oxygen Bottle Holder (style # HACXH0)

- Located on lower back for safety
- Cradle design provides safe installation and extra valve protection
- Accommodates multiple bottle sizes
- Clamp allows for left or right hand location of oxygen bottle valve
- Positioned for easy caregiver monitoring
- A Vertical Oxygen Bottle Holder (style # HACXV0, not shown) is available

Urinary Bag Holder (style # HACU00, shown on front and inset)

- Positioned to minimize dragging and tube crimping
- Located below hip level of patient
- Easily visible to caregiver

Front Dining Tray Assembly and Tray Mounting Arm (style # HACFT0, not shown)

- Coming soon

Wall Guard (style # HACWG0, not shown)

- Located in place of the oxygen bottle holder or on the sides
- Prevents damage to the walls when the recliner is in upright position
