TRANQUILITY SLEEP CHAIR
CF STINSON | APROPOS, CHAMPAIGN | DARK CHERRY
TR1800

The Tranquility collection is versatile enough to comfort everyone. Like our Tranquility recliners, our sleep chair will help your patients find the support they need. And since we've taken the challenge out of something as simple as opening and closing the chair we ensure comfort for both you and your patients.

PATIENT

RECLINERS AND TREATMENT SEATING

LA·Z·BOY RECLINERS

At La·Z·Boy Healthcare, our comfort is all around. From sophisticated and stylish recliners, to innovative lounge and patient room seating, to hard-working task chairs, our total patient seating system provides the ultimate in care and comfort for all your healthcare environments. Please use this portfolio to discover how La·Z·Boy Healthcare's complete collection of seating solutions can provide comfort and convenience throughout your facility.

Head-to-toe comfort

At La·Z·Boy Healthcare, we've brought the commitment to comfort and quality that has made us the chair of choice in home recliners into the healthcare industry. Our healthcare furniture provides patients with in-home comfort that includes infinite position reclining capability, ergonomically-designed lumbar and lateral cushioning, and our patented rocking mechanism*. And we offer caregivers "comfortable solutions," with convenient features that include adjustable side trays, full flatbed reclining, IV mounts, single-touch locking casters and a rear push bar for easy steering. It all adds up to a product line that's comfortable - from head to toe.

Room-to-room solutions

We're furnishing healthcare facilities with comfort and convenience at every turn. From treatment rooms to patient rooms to waiting rooms; employee lounges, to physicians' lounges to private lounges - and everywhere in between. With a wide variety of seating solutions, a vast array of styles, fabrics and colors, and direct, "hands-on" service, we'll help you select furniture that best meets your patients' therapeutic needs, in a style that complements and enhances each of your particular healthcare environments.

Read on – and take comfort in our seating solutions.

* Featured on select models

Technology and design in a harmonious configuration that blends innovative healthcare seating enhancements with sophisticated styling in chairs that look as good as they perform.

Comfort for patients

- The patented La-Z-Boy synchronized back and seat-recline motion provides infinite seating positions. Patients can adjust seating positions to their exact preferences through simple body movement.
- Our exclusive seat back hinge duplicates the natural motion of the patient's body to enhance comfort.
- The patented La-Z-Boy locking footrest provides maximum leg and foot comfort, with profile-style support that eliminates pinch points.
- Mid-ottoman calf-support enhances cushioned comfort for the entire length of the patient's leg.
- Lumbar and lateral cushioning for the lower back helps create posture-correct positioning and motion, allowing patients greater comfort for extended periods of time.
- Adjustable tension control customizes movement for each patient's size and weight.
- Sinuous wire spring suspension and generous cushioning cradle the patient in comfort.
- Available patented rocking mechanism allows easy, soothing rocking regardless of position on the seat.

Cost-efficiency for providers

- The patented La-Z-Boy reclining mechanism has been tested to 100,000 load cycles – well beyond the 25,000 to 40,000 test cycles typical of other recliners. This proven long-term performance helps make cost of ownership easy on the budget.
- Heavy-duty steel-to-steel construction features 11-gauge steel throughout – with no cables – for exceptional strength and longevity.
- All joints are steel-to-steel construction, featuring solid 1/2"-diameter spun steel rivets for remarkable durability.
- Virgin polyurethane foam cushions are highly resilient to hold their shape, support and beauty for years.
- The metal seat frame is built with sinuous wire springs, reducing stress on the steel side rails to provide longer performance life. Seat springs can be changed for maintenance and cleaning, increasing the life of the chair.
- The drive rod, which activates the reclining mechanism, is supported with A-frame shaped reinforcements that will withstand the rigors of daily use.
- Sturdy seven-ply engineered plywood frame delivers lasting structural integrity.
- Our hard maple base provides greater durability for extended chair life.

Safety all around

- Foam cushions exceed the fire standards of California Technical Bulletin 117.
- Patented locking footrest, locking casters and lockout feature on the available rocking mechanism help assure QC recliners won't move in ways you don't want.
- Front end of mid-ottoman support is enclosed for extra safety.
- Our patented KD back bracket and cam lock keep the removable seat back securely in place, even in a flatbed recline.
- Solid steel boxed front-end construction makes arms sturdier to assist patients getting in and out of chair.

Convenience for caregivers

- Easy mobility and infinite seating positions – from upright seating to full flatbed – allow caregivers to administer a wide variety of treatments to patients in the chair without transferring them to a bed, gurney or exam table.
- Full flatbed position can yield an additional -3° pitch if an emergency calls for directing blood flow to the patient's head.
- Emergency lever for negative pitch on a La-Z-Boy recliner is located on the chair's side, not its back, for immediate access in critical situations.
- Side tray provides a convenient prep area for caregivers.

Easy mobility

- Single-touch locking casters make it easy to transport patients and lock out accidental rolling.
- Pullout rolling foot tray provides a comfortable platform for the patient's feet, while being transported.
- Rear push bar enhances steering leverage.
- IV pole mounts let caregivers avoid the hassle of handling a separate, rolling IV stand.

regal & regal II

The Regal II is every bit as elegant as its predecessor, the Regal, while offering some very distinctive features of its own. In addition to patented La-Z-Boy infinite reclining positions, it offers exceptional lumbar support and its silky-smooth patented rocking mechanism soothes and eases stress. The Regal II is ideal for outpatient holding areas, Alzheimer care-centers or any treatment environment where long-term comfort is essential.
